

ABSTRACT

A pivotable mixer bowl including a bowl body for receiving material to be mixed, a first mounting bracket coupled to and extending from an outer surface of the bowl body and having an opening therein, and a second mounting bracket coupled to and extending from the outer surface and having an opening therein. The second mounting bracket is vertically spaced from the first mounting bracket. The opening of the second mounting bracket is generally aligned with the opening of the first mounting bracket to define a pivot axis of the mixer bowl. The mixer bowl further includes a locking bracket coupled to and extending from an outer surface of the bowl body.
